"EXCEPTIONS TO CITED TECHNICAL DATA TO CORRECT REFERENCES TO  
OZONE-DEPLETING CHEMICALS

The technical requirements of this contract reference Ozone Depleting Chemicals (ODC) as defined by the Clean Air Act of 1990. These requirements shall be modified as directed below:

MIL-STD-2073-1

The document(s) above are cited in this solicitation as Category 1 document(s) which contain(s) sub-tier references to documents which require the use of Ozone Depleting Chemicals (ODCs). As Category 1 document(s), the requirements of sub-tier referenced documents are for guidance or reference only and are not contractually binding. The contractor is authorized the use of an appropriate alternative material in place of the ODCs cited in the sub-tier referenced documents when complying with the Category 1 document's requirements. The use of ODCs is not required and the use of alternatives is preferable.

However, where the solicitation clearly indicates that the document is cited as 'Reference Only' or 'Guidance Only', the following applies:

The document(s) reference the use of Ozone Depleting Chemicals (ODCs) as a cleaning solvent, paint thinner material or as a qualification solvent resistance test material. The requirements of this document are not contractual and the contractor is not required to use the ODC. The contractor is authorized the use of an appropriate alternative material in place of the referenced ODCs where necessary. The use of ODCs is not required and the use of alternatives is preferable.

MIL-HDBK-454

MIL-HDBK-454 references to Ozone Depleting Materials found in the Guideline 6 reference to MIL-STD-1334 and the Guideline 43 reference to MIL-L-17331 and MIL-G-24139 are for guidance only. Preference shall be given where appropriate to the selection and use of alternative non-ozone depleting materials.

The above modifications take the first order of precedence in this contract "
